Data Blocks for Finance & Risk Solutions

Intelligently Navigate Risk & Opportunity with Dun & Bradstreet's Category-Defining Data Delivered through Flexible Data Blocks

Finance leaders are tasked with improving business performance by effectively managing risk and increasing efficiency to drive profitable growth. Using Dun & Bradstreet's category-defining data and analytical insights, finance leaders can make more confident and timely decisions to help improve their cash flow.

Dun & Bradstreet makes it easy to consume our data and insights through logical, topic-based groupings of data elements from the Dun & Bradstreet Data Cloud called Data Blocks—a modern method of serving data in a simple, standardized, and flexible way. Data Blocks empower finance leaders to easily ingest the data they require across their enterprise and do that in a consistent and scalable manner.

Combining Data Blocks together using our predefined set-ups unlocks the data and insights required to address any use case across your business. These set-ups of Data Blocks can be delivered via API, flat files, or a combination.

With Data Blocks, you will experience superior data quality & depth delivered consistently. In addition, Data Blocks quicken the time from delivery to value realization through simple, standard implementation and activation. Finally, finance leaders will benefit from flexibility and scalability, enjoying seamless delivery regardless of how much or how little content is ingested, where used, or what need is being addressed.
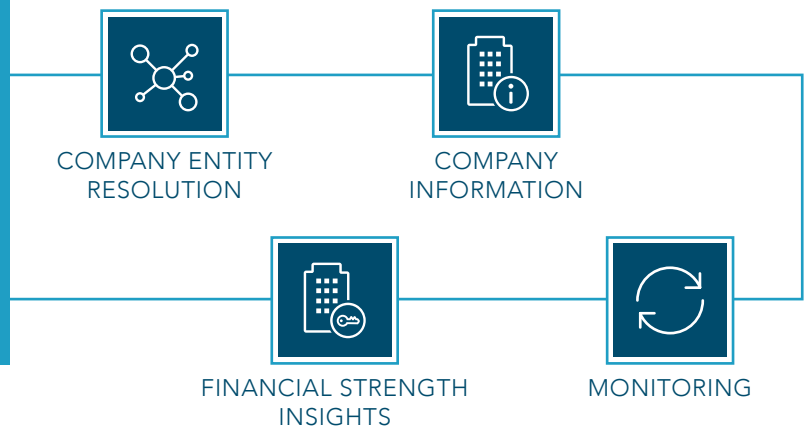

Data management is complex; Dun & Bradstreet Data Blocks make it easier than ever for finance leaders to experience the power of tailored delivery aligned with unique business needs. Dun & Bradstreet will partner with you to advise on the best Data Blocks set-up for delivering the business results you need.

MANAGE RISK WHILE GROWING YOUR BUSINESS

Data Blocks remove the manual work of identifying & researching new business partners to provide a holistic view of risk and opportunity when scaling your business, for example through marketing activities or e-commerce growth. Data Blocks can make finance teams more efficient, allowing you to focus on the more complex decision making and prioritize collections. Streamline your Finance Operations by leveraging Data Blocks to develop a consistent business partner screening & onboarding process.

About the Dun & Bradstreet Data Cloud

The Dun & Bradstreet Data Cloud offers the most comprehensive set of business decisioning data and analytical insights, covering hundreds of millions of businesses and other commercial entities across the globe.

We source data from tens of thousands of sources, tens of millions of websites, and crowd-validating initiatives. Additionally, we leverage information from our global sources, along with proprietary capabilities, to discover and curate millions of business-to-business relationships. These relationships can include corporate hierarchies, ultimate beneficial ownership, alternative-type relationships, historical ownership, and analytically derived connections.

We continuously monitor our vast number of sources for changes that impact information in the Dun & Bradstreet Data Cloud, including dynamic changes to business relationships. Changes are verified, and updates made to the Data Cloud, which consists of over 360+ million business records, as relevant. Our Data Blocks monitoring capability advises of such changes.
