

Press release – Göttingen, 05.09.2022

International Credit Risk Management Conference on September 27, 2022

On September 27, 2022, SCHUMANN will host an online conference on digital credit risk management. Speakers from the company's national and international customer and partner base will discuss new solutions for digitalization in credit risk management for insurance companies, financial service providers & industrial and trade companies. Participation is free of charge.

The economic shocks are currently enormous: rising energy prices, inflation, material shortages and a lack of labor with approaches to wage-price spirals are leading to weakening future expectations in various industries, and in some cases, there is even talk of recessionary threats to the economy. What consequences does this have for the business of one's own company, existing credit lines, supplier and customer credits and how should companies position themselves now? "To answer these questions, our conference offers exciting insights and valuable suggestions," knows Dr. Martina Städtler-Schumann, Managing Director of SCHUMANN. She is certain: "Automated processes are the decisive competitive advantage, because they make companies, banks and insurance companies faster and, above all, more adaptable and resilient."

Consequently, the international SCHUMANN conference in September will focus precisely on these topics. Through two parallel channels, one in German, one in English, the conference will cover a broad spectrum of industries and interests. Panel discussions, speeches and presentations will focus on the following topics:

- How-to-strategies and best practices for dealing with the current economic situation
- Current challenges and approaches to solutions in various industries, such as factoring, industry and wholesale, or credit and surety insurance

The SCHUMANN Digital Credit Management conference will take place as a virtual event via live stream. Städtler-Schumann explains: "We decided to once again focus on the concept of an online event because it gives many more

interested parties the opportunity to participate. In particular, international participants can also benefit from a cross-national and cross-industry exchange."

Representatives of major companies, platforms, and associations such as **Atradius, BPL Global, DZB BANK, FCI, ICISA, ITFA, Nexus Europe, Rhenus Assets & Services, TigerRisk Partners, TRUMPF Financial Service, Pernix Speciality** have already confirmed active participation.

The SCHUMANN conference is aimed at decision-makers and practitioners responsible for corporate development and processes in credit management. Interested parties can find the agenda and an opportunity to register for the SCHUMANN Conference Digital Credit Risk Management on September 27, 2022 here: <https://prof-schumann.com/en/conference>

*About SCHUMANN

With its headquarters in Germany, SCHUMANN is a family-run company that uses modern technologies to create innovative and reliable IT solutions for businesses worldwide. Many years of experience guarantee customers high quality and a stable, cooperative relationship based on partnership. The company's software products and comprehensive, competent consultancy enable companies to do business more efficiently and effectively.

With flexible, scalable products, SCHUMANN offers specific industry solutions in the areas of (credit) risk management, the associated process control and risk evaluation. Companies are put into a position to save costs through optimized processes and thus to increase their competitiveness. Industrial and trading companies, financial service businesses and providers of credit insurance and surety bonds have been relying on software solutions from SCHUMANN for more than two decades.
