D&B Model Context Protocol (MCP)

D&B's MCP servers deliver structured, agent-ready data streams – fueling consistent, high-performance AI across your enterprise and delivering context that performs.

MCP-supported datasets (Data Blocks) for agentic integration include:

- Financial Strength Insights
- Third Party Risk Insights
- Ownership Insights
- Inquiry Insights
- Principals and Contacts
- Payment Insights
- Sales & Marketing Insights
- Shipping Insights
- ...and more

D&B Agent-to-Agent Protocol (A2A)

Built on Google's open-source framework and Gemini-compatible, A2A uses the D-U-N-S® Number to unify and verify data across multi-agent workflows.

D&B's Company Lookup Agent resolves business identities by providing the D-U-N-S® Number and other key company details based on a business name input.
